

National Severe Weather Warning Service

Chief Forecasters Assessment

A frontal zone, along its associated persistent and heavy rain, will remain slow moving across the north and northeast of Scotland today. This will allow some large rainfall amounts to build up with the potential for 30-50 mm to fall quite widely, and locally in excess of 80 mm on high ground in the east.

The Met Office have issued an **Amber Warning of Rain**

Valid from **10:30 on Fri, 12th Oct 2012** until **23:59 on Fri, 12th Oct 2012**

Heavy rain will continue to affect parts of the north and northeast of Scotland today, although it is expected to slowly clear from Angus this afternoon. The public should be aware that the heavy rain is likely to lead to localised flooding and some disruption to travel.
